Berkshire Encyclopedia of Sustainability, Volumes 1-10

General Editor: Ray Anderson, *Interface, Inc.*

In the 10-volume *Berkshire Encyclopedia of Sustainability*, experts from around the world provide authoritative coverage of the growing body of knowledge about ways to restore the planet. Focused on solutions, this interdisciplinary print and online publication draws from the natural, physical, and social sciences to bring readers an unprecedented array of 887 articles—from over 900 contributors from 53 countries—on environmental law and ethics, green business practices, regional sustainability issues, and resource and ecosystem management. The ten volumes are available as individual volumes (see subjects above; each volume is fully indexed) or as a ten-volume set.

2012 • 978-1-933782-01-0 • 10 volumes • 8.5x11" • 6,084 pages • Hardcover • US\$1500 • For more information, visit: <http://bit.ly/sustainabilityset>

“The call we made in *Our Common Future*, back in 1987, is even more relevant today. Having a coherent resource like the *Encyclopedia of Sustainability*, written by experts yet addressed to students and general readers, is a vital step, because it will support education, enable productive debate, and encourage informed public participation as we join, again and again, in the effort to transform our common future.”

—Gro Harlem Brundtland, chair of the World Commission on Environment and Development and three-time prime minister of Norway

“This set of authoritative volumes provides an ‘operator’s manual’ for the long-term sustainability of the human enterprise on planet Earth.”

—Will Steffen, executive director of the Australian National University Climate Change Institute

“This is undoubtedly the most important and readable reference on sustainability of our time.”

—**Jim MacNeill**, Secretary-General of the Brundtland Commission and chief architect and lead author of *Our Common Future* (1984–1987)

“The *Berkshire Encyclopedia of Sustainability* makes a timely and unique contribution to understanding and professionalizing the concept of sustainability to which Rio 120 is dedicated.”

—**Maurice Strong**, former Secretary General of the 1992 UN Conference on Environment and Development (Rio Earth Summit)

“Sustainability will be the defining discipline of the 21st century. Making sense of the sprawling body of sustainability knowledge and insights—to help make it available for a growing audience—is a massive challenge. *Berkshire’s Encyclopedia of Sustainability* has risen to that challenge with flair, imagination and commanding authority.”

—**Jonathon Porritt**, founder/director, forumforthefuture.org

“The Enlightenment of the 18th century had its famous encyclopedia that catalyzed dramatic improvements in science, society, and governance . . . the dawning Ecological Enlightenment of the 21st century now has its encyclopedia to light the way forward to a durable and decent future for humankind . . . a compass for a long, perilous journey through an unknown territory.”

—**David W. Orr**, Oberlin College, author of *Hope is an Imperative* and *Down to the Wire: Confronting Climate Collapse*

“The 21st century will be the age of sustainability or bust. As the journey becomes imperative, there is no better *vade mecum* than the *Berkshire Encyclopedia of Sustainability*—informative, lively, and comprehensive in its scope.”

—**Isabel Hilton**, editor, chinadialogue.net

“It’s past time for proponents of sustainability to move beyond empty slogans and baby steps. Everyone who is ready to get serious will profit from this robust, comprehensive, diverse collection of cutting edge thinking from some of the smartest members of our species.”

—**Denis Hayes**, principal organizer of the first Earth Day, and president of the Bullitt Foundation

“Assuming we’re wise enough to heed the warnings of scientists, this will have to be the century of sustainability. And this comprehensive set of volumes will help form the core of a library for informed citizens.”

—**Bill McKibben**, author of *The End of Nature*

“This is an ocean of information. Nowhere else is there so much knowledge and wisdom to be found as within these encyclopedias. This last volume is the icing on the cake. Every university, every school, and every library will be enriched with this treasure of knowledge.”

—**Satish Kumar**, editor, *Resurgence Magazine*
